

HOWSON DAM & POND CITIZENS COMMITTEE

NOV. 20,2020
NEWSLETTER

At the last North Huron Council meeting, Chant Limited, was the engineering firm chosen to test the base of the Howson Dam, in a recorded vote of 5-2 in favour. Chant Ltd proposed a two phase project, with each phase costing just a little over \$46,000. ea. The starting date is yet to be decided.

In the meantime, plans are going ahead to get another group of volunteers to make another set of stop logs for the dam, which should raise the water level in the pond by approximately 12 inches or 20 cm.

As the festive season is quickly approaching, please take extra precautions. We really want to see you enjoying the pond next summer. Since we started recording pond users with pictures on our website, we recorded over 150 different users in July and August of this year.

Stay Safe,
Rennie Alexander, HD&PCC chairperson
