

Dear Editor.

July 08 2020

North Huron Council accepts the recommendation of the committee of council investigating the future of the Howson Bridge and Dam.

On behalf of the Howson Dam Citizens Committee, we would like to thank the committee of council that took a year to deliberate and make a final recommendation.

The Committee listened to many engineers discuss the pros and cons of repairing or decommissioning the bridge/dam, plus there were a number of legal ramifications that had to be considered. Also, there were engineers that talked about the pros and cons of a hydro generating plant.

The greater community also had input to the Committee through presentations by groups and organizations and letters from North Huron residents.

This was a big commitment of time and energy by these volunteers to reach their final decision.

Again, on behalf of the Community, thanks very much.

Rennie Alexander, Chairperson, Howson Dam Citizens Committee
