Keeping you up to date.

The link to North Huron's website has been updated to include pictures and information that was on display at the Environmental Assessment process meeting. It can be found here

<http://www.northhuron.ca/publicworks.php?area=de48>

A printable version of the comment sheet is now available too. They have determined that the comment sheets will be very important in their process.

They can be filled out online or hand written on the printable version.

Arrangements can be made to pick up hand written comments and online copies can be cc'd to howsondamrepair@gmail.com

One comment you might consider making to the Township is

"The Environmental Assessment should be put 'ON HOLD' until the Township applies to the MNR for approval to repair the Dam"

If that was done, we would then know what is involved with getting a Permit to repair and maybe save some of the \$90,000 being paid to the EA consultant

Any other comments are welcome. They only want 1 person for each comment.

Additional information is here <http://savethehowsondam.weebly.com/>

Don't forget to check out the pictures of people using the Pond - might be able to use this as part of the pond usage data collection.

We can be reached at howsondamrepair@gmail.com
