

Thank You

The Howson Dam Committee would like to thank you for your continued support to have the Howson Dam in Wingham repaired and the pond restored.

To date we have made numerous presentations to the Council of North Huron to reach our objectives, which are to improve the appearance of the Howson Dam and re-establish the previous water levels in the pond. With your input at meetings, sending emails and texts, the Council has agreed to put the Environmental Assessment on hold and proceed with a request for proposals to conduct a Dam Safety assessment and investigate the fish species at risk above the dam.

In addition, we have several Hydro Generating companies that are willing to invest in our community by installing a hydro generating plant that would provide green energy plus help pay for the maintenance and repair of the dam.

We still have some “bridges to cross” but our goals are achievable. Watch our progress on Facebook or check out our website savethehowsondam.weebly.com/. Encourage your friends also.

Thanks again!

Have a very merry Christmas, from the Howson Dam Committee.
